Sub Total						\$32.18
17	Total Charges					\$1,069.84

13 Interstate Access Charge

The IAC is a charge to defray the costs of maintenance and upkeep of the network so that customers can access the interstate telecommunications network to place and receive interstate long distance calls. This charge is assessed at separate flat rates for single and multi-line customers and is subject to FET, Federal USF, the Network Access Assessment, and State Taxes. This is not a charge for long distance services.

14 Interconnection Fee

The ICF is a flat-rate, monthly charge assessed on lines and circuits, designed to recover portions of the Company's costs of interconnection to the public switch telephone network (PSTN). The ICF is charged per line or circuit.

15 Network Access Assessment

The NAA is assessed as a percentage of recurring charges for local and intrastate services (depending on service location); interstate and international services, data, IP-platform and cloud services; private-line services; and the Interstate Access Charge (IAC) and Interconnection Fee (ICF).

16 Taxes and Surcharges

Integra Telecom collects federal, state, and local taxes and other fees and surcharges levied on communications providers or the sale of goods and services on behalf of the government entities that impose these charges. These include, but are not limited to, sales taxes and municipal franchise fees. These taxes and fees vary by state and local jurisdiction.

17 Total Charges

The sum of current charges and adjustments. Credit adjustments are designated with CR after the amount, and are subtracted to arrive at the Total Charges, while Debit adjustments are added.

FIRST INVOICE NOTICE:

You may notice on your first Integra statement that your monthly charges are higher than expected. Since your invoice date may not match the date your products were installed, you may see partial month billing on your first statement. Partial month billing covers the period of time that your service was installed up to invoice date. Your following month's invoice will better reflect your standard invoice amount.
